Week 11 : Programming Assignment 2

Due on 2023-10-12, 23:59 IST

Write a C program to find $\int_a^b x^2 dx$ using Trapezoidal rule with 10 segments between a and b. The values of a and b will be taken from test cases

Your last recorded submission was on 2023-10-11, 11:16 IST

Select the Language for this assignment. C

```c
#include<stdio.h>
float func(float x);
int main()
{
  int n=10; //Taking n=10 sub intervals
  float a,b,integral; //integral is the integration result
  scanf("%f",&a); // initial limit taken from test case
  scanf("%f",&b); // Final limit taken from test case

//Use the printf statement as printf("The integral is: %0.6f\n",integral)

  int i;
  float h,x, sum=0;
  if(b>a)
    h=(b-a)/n;
  else
    h=-(b-a)/n;
  for(i=1;i<n;i++)
  {
     x=a+i*h;
     sum=sum+func(x);
  }
  integral=(h/2)*(func(a)+func(b)+2*sum);
  printf("The integral is: %0.6f",integral);
  return 0;
}

float func(float x)
{
  return x*x;
}
```

Problem Solving Session - July 2023 ()

You may submit any number of times before the due date. The final submission will be considered for grading.

This assignment has Public Test cases. Please click on "Compile & Run" button to see the status of Public test cases. Assignment will be evaluated only after submitting using Submit button below. If you only save as or compile and run the Program , your assignment will not be graded and you will not see your score after the deadline.

Save as Draft | Compile & Run | Submit | Reset

Sample Test Cases

	Input	Output
Test Case 1	0 1	The integral is: 0.335000
Test Case 2	1 3	The integral is: 8.680000
