General Purpose Utilities in Linux

1) Display the calendar for the month of March 2012

#commands in terminal

```
cal 3 2012
```

2) List all the files and directories of the directory /usr/lib on the terminal. Now put the same information in a file named results. Display the contents of the file results now.

#commands in terminal

```
ls /usr/lib > results  
cat results
```
