

More on Redirection

- 1) Create X_file.txt file with some content.
- 2) Redirect the content of both out_file.txt and X_file.txt to a new file

#commands in terminal

```
gedit X_file.txt  
gedit out_file.txt  
gedit redirect.sh  
chmod +x redirect.sh  
./redirect.sh  
Cat results.sh
```

#commands in shell script

```
#!/usr/bin/env bash  
ls /usr/user 2>out_file.txt  
cat X_file.txt out_file.txt > results.txt
```
